MUTE

DESIGN fredrik mattson

HORREDS[®]
1936

May we ask for utmost silence?

To sit in Mute is an experience. It's surprising how much difference there is noisewise on the outside and the inside. With its upholstered walls and ceiling, it feels, just like sitting in a completely different room.

The uses are many, depending on you choose to place Mute. Placing the two sofas facing each other increases the feeling of being in a separate room and the silence is almost total. A lone Mute is like on it's own like a little thought bubble. Concentration. Where did the world go?

Mute is available in white lacquere, optional NCE or veneer(Oak, ash, ebonized oak, ebonized ash, white pigmented oak, white pigmented ash).
