May we ask for utmost silence?

To sit in Mute is an experience. It's surprising how much difference there is noisewise on the outside and the inside. With its upholstered walls and ceiling, it feels, just like sitting in a completely different room.

Mute floor takes off in the old time phone booth. In Mute floor you're seated comfortable and work concentrated for a short moment. It's not just the obvious advantage with the silence, you also signal to your co-workers that you want a moment for yourself.

Our new models are built on the success of the sofasystem Mute.

Mute floor is available in white lacquere, optional NCE or veneer(Oak, ash, ebonized oak, ebonized ash, white pigmented oak, white pigmented ash).

Price classes for fabric see price classes fabric at www.horreds.com

SEATING > MUTE Floor
