Kappa is part of a furniture concept primarily designed for school environments, but works just as well at the office or conference.

Simple and smart solutions which makes the everyday different. It creates exciting expressions with its sustainable constructions and honest material. Room creating and sound absorbing screening when you need to focus a little more.

Pi is a big sound absorbing lamp in felt, which creates a "room feeling" even if you're seated in a open office or school environment.

Pi is 2 meter in diameter with LED.lighting. Black suspension wire and electrical cord, around 3,5 m. minimum build height from ceiling to lower edge lamp: 70 cm.
