

Care instructions for lacquered furniture

We make many of our furniture in lacquered materials. As with wooden or veneered furniture, the furniture is affected over time. In order for you to enjoy Your Horred's furniture, we have compiled a number of instructions:

Handling and maintenance:

- Never place the furniture on damp surfaces.
- Felt pouches should be mounted when used on synthetic or varnished floors to avoid scratches on the floors.
- The furniture should only be used indoors.
- Screws and fittings should be checked at regular intervals so that they are properly tightened.
- Never place colored candles or attach tape to the furniture.
- Always protect the furniture against hot objects, strong solvents and water. NOTE! Do not use solvents or abrasive cleaners.
- Highly colored liquids, e.g. coffee and wine, should be immediately wiped off.

Mounting:

- When mounting, it is very important that the product is mounted on a clean and soft surface in order to avoid damage to the paint.
- Be careful with edges and corners, they can be damaged if they bump when assembled.
- The surface is sensitive to scratches and bumps, be careful.

Care instructions:

- Clean with well-wrung dampened soft cotton cloth containing only water or mild soap solution. Wipe dry with dry soft cotton cloth!
- Be careful when placing hard or sharp objects that can damage the surface of your furniture. Use coasters, felt bags or fabric materials.

Keep the above mentioned in mind so you will be able to enjoy Your Horred's furniture for many years.
